

State of Utah

JON M. HUNTSMAN, JR.
Governor

GARY R. HERBERT
Lieutenant Governor

Department of Agriculture and Food

LEONARD M. BLACKHAM
Commissioner

OFFICIAL NOTICE

Your property has been scheduled for insecticide treatment – SOIL & FOLIAGE. Including; your fruit trees, grapes, raspberries, vegetable garden, etc. The insecticide Merit® 2F, containing the active ingredient imidacloprid, will be applied to all turf and planting beds to control Japanese Beetle larvae in the soil. The insecticide Carbaryl 4L and or Tempo® Ultra SC, containing the active ingredients carbaryl and or beta cyfluthrin will be applied to above ground leafy foliage of edible food crops and ornamental plants, for the control of Japanese Beetle adults. Please be sure to follow all the before and after treatment steps.

Application Dates: _____ **Approximate Time: MORNING AFTERNOON**
Applicator: TruGreen Chemlawn

You do not have to be present during the treatment as long as the applicators have access to your property, including the backyard, and you have made arrangements for all family members, including pets, to be out of the yard until reentry is possible.

Before Treatment

Move all items i.e. lawn furniture, children's and pet's toys, pet food and water dishes indoors or to a garage or driveway before application. Please move any barbeques, lawn furniture, trampolines, toys and other miscellaneous items away from your trees and shrubs. Large, stationary or fixed items should be covered with a large garbage bag or inexpensive disposable plastic painting drop cloth. **Close all windows** and turn off or adjust your window air conditioning unit so that it does not draw air in from outside during the Tempo® application. Cover if you desire. **Move or cover cars, etc. from under trees to keep clear of any overspray.** If you choose to cover these items, use an inexpensive, disposable plastic painting drop cloth. Do not reuse this cloth.

Thoroughly and securely cover any water feature that contains fish or other aquatic animals. Keep family members and pets indoors during the application on your property and until the after treatment steps have been completed.

After Treatment

WATER THE INSECTICIDE INTO THE LAWN. DO NOT WATER FOLIAGE UNTIL DRY 24 TO 48 HOURS.

Wait until the grass and foliage has dried before allowing family and pets in your yard. Carefully dispose of any tarp material while wearing chemically resistant gloves.

Wash any exposed items with soap and water. Encourage careful hand washing. Avoid contact with the wet Carbaryl 4L, Tempo® and Merit® mixture on you skin and eyes. If skin contact is made, wash the affected area thoroughly with soap and water and rinse for 15 minutes. If the material should get into your eyes, flush gently with water for 15 to 20 minutes. If irritation persists, get medical attention or call the poison control center (1-800-222-1222.)

For further information, please call (801) 538-7100 or (801) 538-4912 or visit www.ag.utah.gov
